IN THE SPECIFICATION

Please amend the Abstract as follows:

~~{0119} Disclosed herein is a method for retrieving data from a storage media. One~~
embodiment of a~~The method for retrieving data from a storage media~~ comprises: rotating a
storage media having a substrate comprising at least one plastic resin portion and at least one
data layer disposed on at least one surface of ~~said~~the substrate, wherein ~~said~~the substrate has a
surface roughness of less than about 10Å, and an axial displacement peak of less than about 500
μ under shock or vibration excitation; directing an energy field at ~~said~~the storage media such that
~~said~~the energy field is incident upon the data layer before it can be incident upon the substrate;
and retrieving information from the data layer via ~~said~~the energy field.
